## **IHBC Annual School - Manchester 2017**

**Thursday 22nd - Saturday 24th June 2017**

**Day School Friday 23rd June 2017**

This year's Annual School examines the rich legacy of transport infrastructure, exploring both its continuing role as a future driver of change and economic growth as well as its impact upon historic places. The emergence of transport networks brought massive physical change to the urban and rural landscape and the structures associated with road, river, canal, rail and air transport continue to shape the world around us. New modes of transport and communication were critical to the industrial revolution and ongoing expansion continues to stimulate economic, social and cultural exchange and interaction. Much of this accumulated historic transport legacy survives and remains in operation, often adapted to serve new needs and sometimes reinvented and converted for new purposes.

As the birthplace of the industrial revolution and now heralded as the beating heart of the Northern Powerhouse, Manchester and the North West is a fitting location to experience the legacy of historic transport infrastructure and consider the potential impact that ambitious new projects might have upon the historic environment. The region is home to a wealth of pioneering and iconic transport structures, from the world's oldest surviving passenger railway station in Castlefield, Manchester; Liverpool docks, now a key part of the Maritime Mercantile City World Heritage site; the Bridgewater Canal, the country's first industrial canal; to twentieth century motorways, bus stations and airports.

Annual School includes:

- Regeneration of Historic Ports - Peter de Figueiredo
- Managing the Canal Heritage - Nigel Crowe, Canal & River Trust
- Historic railway structures - Simon Bradley
- Upgrading the UK's historic railway infrastructure - William Filmer-Sankey, Alan Baxter
- Death by Motorcar: The slow strangulation of our historic cities - David Rudlin, Urbed
- Between Land and Sky: Historic Air Transport Infrastructure - Kate Martyn & Victoria Perry, Donald Insall Associates
- Tours exploring all facets of Manchester's historic and modern infrastructure.
- Day trips to experience key sites in Liverpool, Preston and Cheshire.
